SACT COMMUNICATION & NETWORKING

STRUCTURED NETWORK CABLING

Structured Cabling - the Cable Infrastructure.

Entering a competition aiming at winning needs well thought tactics. SACT empowers service innovation, with a lean and motivated organization, to provide our customers with reliability and seriousness, but, even more importantly, with the quality of relationship SACT adds on a 'genetic' wish to always develop new products, seeking products, seeking effective, yet new, solutions

SACT installs structured cabling networks that can easily adapt to your organization's changing requirements. Whether its category 5E, category 6, 6a, category 7 or fiber optics cables, we won't just lay your cabling - we'll lay a firm foundation for your future plans.

SACT provide horizontal data cable, and telecommunication installation services for your company. We offer both computer and cable services, giving your project a "single source" vendor. This turn-key service insures that your networking project will be closely engineered, and save you time and money.

Category 5e or 6 cables or perhaps Gigabit or Fiber Optics cables? SACT will guide you in the right direction. SACT only uses the highest quality cabling, connectors and components from leading manufacturers to ensure that our workmanship and your network are not compromised.

SACT COMMUNICATION & NETWORKING

Structured cabling is simply defined as *'the entire wiring system used to transmit data, video and voice information.'* And this is SACT's specialist area - our full service. With this approach you'll have complete confidence in every aspect of your network infrastructure. Our forward thinking approach will ensure that your network infrastructure remains an asset well into the future. And with few satisfied customers we can confidently backup our claims!

SACT builds the future right into today's networks. Never satisfied with meeting only current standard, we design and build systems fir what really matters; top performance for today and for tomorrow. By delivering on all four areas of network performance –products, design, installation, and connectivity.

Products and design plans can deliver top performance only if they are expertly installed .Even the finest components and the sleekest design will come to nothing without proper installation .SACT ensures high installation standards through a highly qualified, efficient and experienced staffs.

With this vast range of high-quality products, design and installation practices SACT takes your network to the next dimension

SACT COMMUNICATION & NETWORKING

Audio / Video Intercom System.

Video Intercoms can increase your overall safety at home or at your business by allowing you to see who is at the door before you decide to open it or not open it. Home Security Store has a variety of video intercoms from high end models to more economical ones which produce images in both color and black and white.

A video intercom system works with a camera unit mounted outside the entrance door (or designated area) and a display monitor installed inside your home (or business) showing what the camera is pointing at. Typically when someone presses the call button on the outside video intercom unit or rings the door bell it activates the camera and alerts the indoor monitor. You can then talk to the person as you look at their image.

Some video intercom units have built-in memory that will record the images of visitors who ring the buzzer. The memory will hold a time and date stamp as well. In addition, some higher end intercoms have a built in open button in which you can lock and unlock your door to allow visitors in.

The lower priced video intercoms are usually black and white and come with basic features. While the higher priced intercoms are colored and incorporate the features of a surveillance system with built-in infrared lights that will allow you to see your guests at night. Some systems might even have a manual turn on function in case your visitor knocks rather than rings the door bell.

There's nothing quite like a video intercom system to add convenience and safety at your front door. You'll be able to see and hear who's at the front door without getting anywhere near it.

Our intercom system is much more than a communication system. We have a wide range of standard and optional features to suit your household, office and warehouse needs.

Features

- Audible screening of visitors at the gate / door
- Audible monitoring of children / selected rooms
- Hands-free reply
- Privacy
- Optional music input facility
- General and selective room calling
- General Paging
- House-wide communication
- Gate / door answering and release
